

MOSES KARANI

Software Engineer

morcescodex@gmail.com • +254 795 968 681 • Nairobi, Kenya (Remote Possible)

[My Portfolio](#) • [LinkedIn](#) • [Github](#)

I'm a dynamic Software Engineer dedicated to finding solutions to complex challenges. With 3+ years of professional experience, a strong drive for learning, and a detail-oriented approach, I craft efficient, innovative, and user-centric solutions. My goal is to contribute to meaningful projects, leveraging my technical expertise and fostering collaborative success.

WORK EXPERIENCE

Software Engineer | Cojani Labs

03/2025 - Present • Remote

- Develop and maintain full-stack features across client projects, working closely with cross-functional teams to translate product requirements into scalable, production-ready code.
- Build responsive, accessible front-end interfaces and integrate them with RESTful back-end services, prioritizing performance and maintainability.
- Collaborate in an agile workflow, participating in code reviews, sprint planning, and QA cycles to ensure consistent delivery quality.

Software Engineer | VPMTECHLAB

01/2025 - Present • Nairobi

VPMTechLab is a software agency focused on building custom solutions for businesses.

Contact: Victor Wanjala - +254700794573

Lead Software Engineer | Exhibit IT Solutions

04/2024 - 01/2025 • Nairobi, Kenya

Exhibit IT Solutions Limited is a Technology Solutions Provider based in Kenya, serving the East African Region.

Contact: Viola Masanja - 0714761775

Software Developer | Memory International Limited

03/2024 - 04/2024 • Mbagathi, Nairobi

Contact: James Ngugi - 0725805224

Software Engineer | Nuri Technologies

11/2022 - 01/2024 • Juja, Kenya

Nuri's goal is to develop innovative solutions that are meant to improve the lives of people in their day to day activities and promote efficiency.

- Front-End Excellence: Led React-based front-end page development, enhancing user engagement and efficiency.
- Global Component Innovation: Optimized components for multiple apps, accelerating feature deployment.
- Seamless Integration: Merged Node.js back-end with front-end, ensuring data flow and system synergy.

Contact: Arthur Karanja - 0728829146

EDUCATION

Software Engineering Bootcamp | Moringa School

01/2022 - 07/2022 • Software Engineering

Bachelor's Degree | Jomo Kenyatta University of Agriculture and Technology

09/2017 - 11/2021 • BSc. Analytical Chemistry

TECHNICAL SKILLS

Git and GitHub • Ruby • JavaScript • ReactJS • REST APIs • Python • PostgreSQL • Docker • Agile Methodologies
• Typescript • Node.js/Express • Jenkins • Next.js • React Native • Expo

PROJECTS

Mkombozi Hospital Management System

A comprehensive hospital management system currently in active use by a hospital in Tanzania, streamlining patient records, appointments, billing, and clinical workflows for hospital staff. Built with React and Node.js (Express).

- Role: Front-End Development & Quality Assurance
- Built responsive, role-based front-end interfaces (admin, clinician, and reception views) using React, translating complex hospital workflows into intuitive, easy-to-navigate screens.
- Implemented and maintained QA processes, including manual test cases and bug tracking, to ensure system reliability for real-world clinical use across departments such as patient registration, appointments, and billing.
- Worked closely with the Node.js (Express) back-end team to integrate APIs for patient data, scheduling, and billing modules, ensuring accurate real-time data flow between front-end and back-end.
- Supported UAT (user acceptance testing) with hospital staff, gathering feedback and iterating on the interface to improve day-to-day usability for non-technical users.

TICKETIKO

An all-in-one event management and ticketing platform, taken from concept through to a live production product. Built with Node.js (Express) and React.

- Role: Full-Stack Developer (end-to-end ownership)
- Owned the entire development lifecycle solo, from architecture and database design through to deployment, handling both the React front-end and the Node.js (Express) back-end.
- Designed and built core event and ticketing features, including event creation, ticket tiers, checkout, and order management, with a focus on a smooth, reliable purchase flow.
- Built and integrated REST APIs for events, ticketing, and payments, ensuring data consistency between the client and server.
- Managed the full path to production, including deployment and ongoing fixes, resulting in a stable platform live at ticketiko.com.

PRevail

A web application that streamlines the management of brands and all PR activities in one place. Built with ReactJS.

- Role: Front-End Development
- Built responsive, reusable React components and interfaces for managing brands, campaigns, and PR activities in a single dashboard.
- Translated product and design requirements into clean, maintainable UI, working closely with the back-end team to integrate data through REST APIs.
- Focused on usability and performance across the platform's core workflows, helping deliver a smooth experience for day-to-day PR management.
